EXPERIENCE

Howard Hughes Medical Institute, Janelia Research Campus, Ashburn, VA

Research Technician II, Jayaraman Lab. Dec 2021 – Present

- Pioneers the use of mature *Danionella*, tiny, translucent fish, to study the neuronal basis of navigation
- Collaboratively designs, tests and optimizes a multi-component behavioral rig, including a fish tank, maze arena, IR lighting, synchronous cameras, automated feeding, and sound stimuli and recording
- Establishes replicability by using MATLAB and python for machine learning based animal tracking
- Builds team knowledge by regularly presenting data and scientific literature at lab meetings

Howard Hughes Medical Institute, Janelia Research Campus, Ashburn, VA

Research Technician II, Keleman Lab. Jan 2017 – Dec 2021

- Published novel findings on memory formation and persistence in neural circuits
- Conducted courtship conditioning, sleep, and neural luminescence assays with precision and speed
- Expertly applied *Drosophila* genetics for flawless execution of crosses and stock maintenance
- Ensured successful publication via contributions to scientific discussions and manuscript revision
- Employed multiple software applications to accurately record, rigorously analyze and visualize data

Howard Hughes Medical Institute, Janelia Research Campus, Ashburn, VA

Research Technician I, Project Technical Resources. June 2015 – Dec 2016

- Expertly dissected and mounted adult *Drosophila* central nervous systems
- Reliably provided precise immunohistochemistry and confocal microscopy data to collaborators
